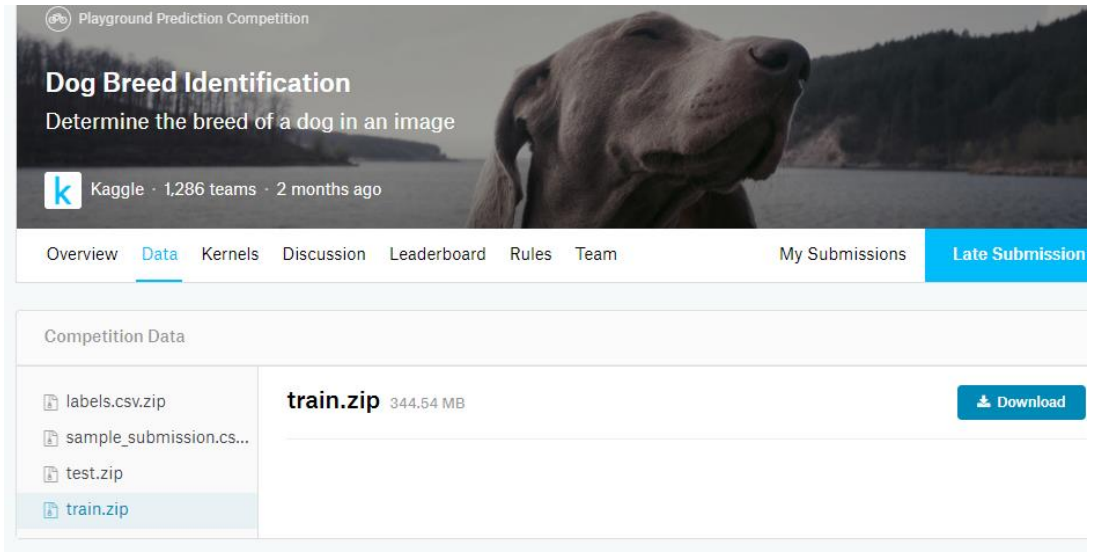
Machine Learning

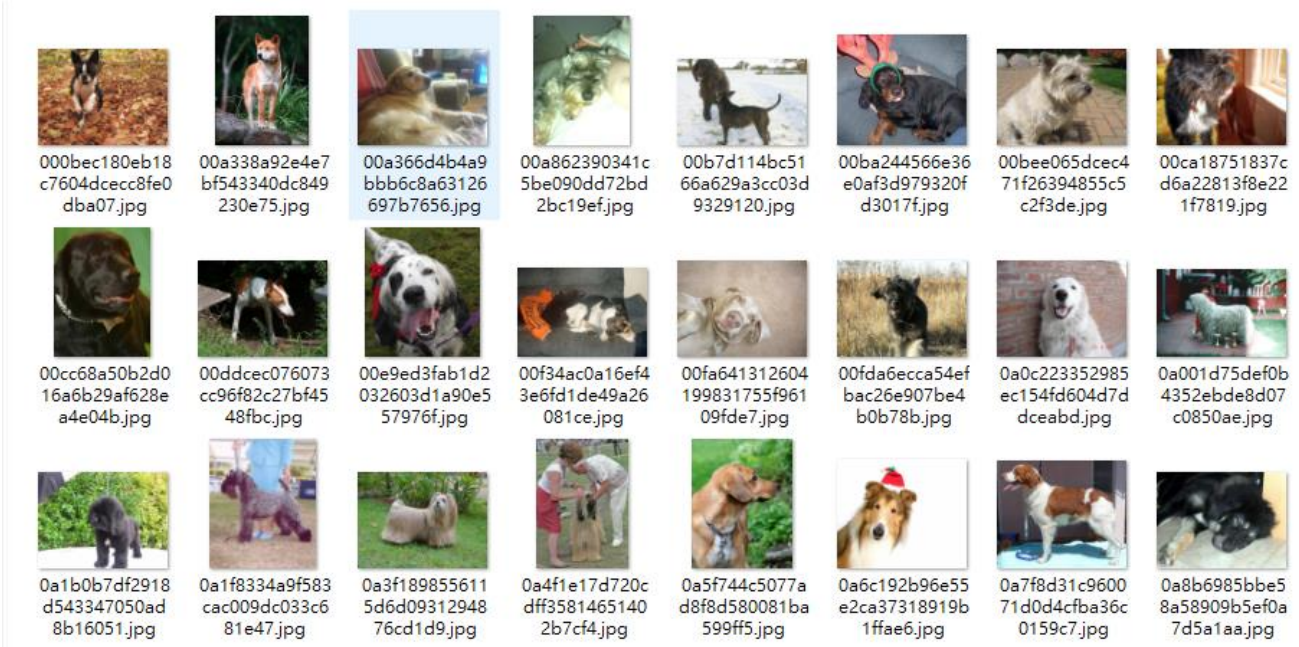
Assignment #3

Dog Breed Identification by Tensorflow

Dog Breed Identification by Tensorflow

- All the images can be downloaded at:
  - 120 classes, Train:10222, Test:10357
    - https://www.kaggle.com/c/dog-breed-identification





Classification Label

- labels.csv : id(image),breed(label)

	1	2	3	4	5	6	7
1	id	breed

Reference Code

- Reference Code資料裡包含:
  - model.py - vgg16 模型
  - hw3.py - 改寫data preprocess
  - model - 存放model的地方
  - pretrain weight(用uiuc-sports): https://drive.google.com/drive/folders/1t2mS5i_u1B5RFfPs4i5EWKQmcNenZB78

Prediction Results

- sample_submission.csv
- 該張圖片對應到120個label的機率

Assignment #3

1. Setup Tensorflow environment.
2. Study the Tensorflow sample code
3. Modify the Tensorflow sample code (or write your own) to use VGG model to train dog breed dataset.
4. Tuning your model as best as you can.
5. Upload your testing results (.csv) to E-Course:
   - You can also upload your own results to https://www.kaggle.com/c/dog-breed-identification to see the ranking of your results.

Requirement for Assignment #3

1. Train your model with initial settings:
   - Pre-trained weights by uiuc-sports. See page 4.
2. Show the error curve/accuracy curve versus iterations.
3. Submit **two text files** and your **code** to E-Course
   - Readme – How to run your code
   - Report
     - Method description
     - Experimental results - accuracy
     - Discussion of difficulty or problem encountered
4. Deadline: 05/23(Wed) 11:59p.m
